

smart cow

TRY SOMETHING UDDERLY DIFFERENT.

The Smart Cow Teat from Stallion is designed to fit all Stallion feeders. Fitted with a removable valve, the Stallion Smart Cow Teat has been designed for calves from 1-6 weeks and can be used with or without the valve.

The Smart Cow teat with the valve is ideal for calves 1-6 weeks as it helps the calves drink milk. When calves are older than 6 weeks, simply remove the valve as the calves have to suck harder, helping to further stimulate the saliva for better rumen development.

PEACH TEATS AND ADAPTORS

The Milk Maid series features a range of compartmentalized pen feeders available from 1 to 20 teat models. They are made of tough, durable plastic with rounded edges to make it easy for transporting and cleaning. Complete with steel brackets and screw in peach teats, they are easy to take off to ensure a hygienic clean.
